January 2023

New Year with Fresh News

We are excited to launch the year 2023 with our first official Newsletter to the Amplivo Community.

We have just finished the year 2022, which, to say the least, was monumental in many ways.

I, together with the entire Management Team and the Top Leadership of the Amplivo Network feel that last year has been the hardest part of our work, during which the foundation of the new Amplivo company has been built, since Corsair Group took over the ownership of Amplivo from its previous owner in March 2021.

As you have been following the many announcements of our progress, which we have made over the past year, we can say with much confidence, that we now have a great business model which is proven and holds massive future potential, together with a company that is now functioning and operating better than it has ever before.

With all things said, we are very excited to launch the year 2023 with you and see great things happening for us as a business, as a company, and most importantly as a community, as we keep on growing each day, by developing ourselves as individuals and as a community.

In this Newsletter, as well as in future Newsletters, we will cover with you key points and the recent updates in the many areas of our business and operations, including the Amplivo Company, the CSR Plastic Credit, and the Corsair Group of Companies in general.

Our intention is always to keep the Newsletters simple and easy to read in a matter of a few minutes. We aim to provide you with the much-needed information and updates, in order to develop your Amplivo business to the next level, as an Amplivo Influencer and/ or generally as a member of the Amplivo-CSR Community.

We wish to thank you very much for the amazing start that we had together last year and wish to welcome you to grow and reach new limits with us during 2023!

Let's begin the year now together at full speed!

With Kindest Regards,

Jussi Veikko Saloranta
CEO Amplivo Limited / Corsair Group International

Amplivo LAST UPDATES

Amplivo pre-launch in Canada

As recently announced, Corsair and Amplivo have officially started the pre-launch of the Amplivo business in Canada, including the establishment of Amplivo Canada Inc., a company registered in the province of Quebec.

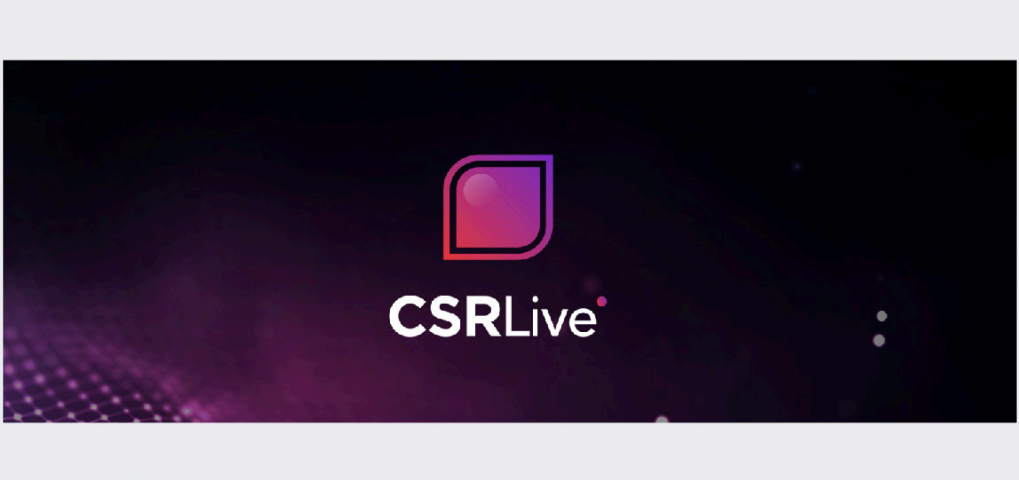
This is a major step for the entire Corsair Group as we now enter the North American market. Our target is to also launch a Corsair plastic waste chemical recycling facility in Canada soon.

From Canada, our intention is to expand the operations into the United States of America, both with plastic recycling as well as with the Amplivo Network.

We are also delighted to announce the appointment of Mr. Rock Berard, as the Executive Director of Amplivo Canada Inc., in charge of managing the day-to-day operations of the company and the Amplivo Network in Canada.

The Prelaunch period of Amplivo Canada is planned to last until the end of February 2023, during which time the local Canadian Amplivo leadership team is developed, trainedand become active.

The official Launch will take place in March 2023 with a Launch Event in Canada!



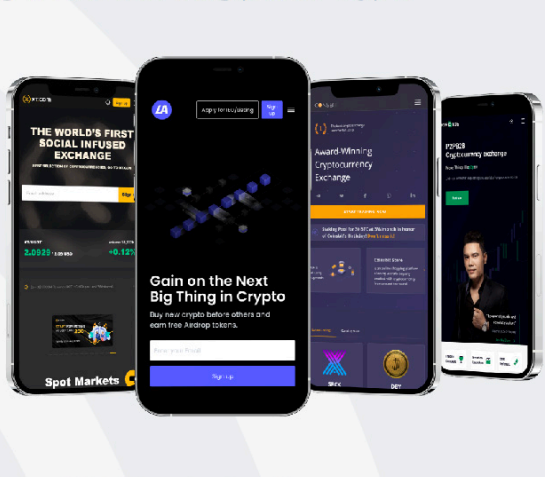
CSRLive sunset

The exchange CSR.live has now been sunset and is no longer in operation. Due to the enormous success of the public Exchange adoption of CSR, it was decided it is time to sunset CSR.live.

CSR.live was launched in April 2021 to support the CSR Ecosystem pending the adoption of the CSR Plastic Credit by public exchanges.

Today CSR Plastic Credit is recognized as the leading Plastic Credit and is available for public trading on the following public Crypto Asset Exchanges:

- ***XT.com***
- ***LAtoken.com***
- ***Coinsbit.io***
- ***P2PB2B.com***



THE WORLD'S FIRST SOCIAL INFUSED EXCHANGE
Spot Markets
Gain on the Next Big Thing in Crypto
Award Winning Cryptocurrency Exchange

We recommend that you register at one of the above exchanges.

PLEASE NOTE: CSR.live was Sunset (CLOSED) on December 31st, 2022.

Thank you for your support of the CSR Plastic Credit.

ECOVO
SHARING MATTERS

Ecovo sunset

Ecovo.com has now been sunset and is no longer in operation. All subscriptions to Ecovo solutions expired on or before June 1st, 2022.

Ecovo.com was launched in October 2020 to support the mission of the Amplivo network. With the acquisition of Amplivo Ltd by Corsair Group the increased social media activity and media publications covering both companies it is now considered time to sunset Ecovo.com in its current form.

Corsair has plans for Ecovo and you should watch out next year for additional activities around the brand Ecovo.

Today, Amplivo and Corsair have been covered by over 200 media articles and maintains a constant stream of updates at ***CorsairNow.com***. Please monitor this official channel for future updates.

Thank you for your support of Ecovo.

Amplivo Educational Program and the introduction of Mr. Elliot Hiller, Amplivo Network Coach

We are also delighted to launch a brand new Amplivo Network Marketing Educational Platform, which aims to offer specific education for all Amplivo members in the areas of Network Marketing and Personal Development.

For a long time, this has been an area within the Amplivo company, which has been in need of a lot of development, but the time for launching this was right. Until now.

We are therefore very happy to be able to now introduce ***Mr. Elliot Hiller*** as the newly appointed ***Amplivo Network Coach***. With so many things coming together within the Amplivo company, we are very excited to begin the work on this area and to introduce a person who will be in charge of developing this with us.

Let's give Elliot a warm Amplivo welcome as he joins our team to assist all the members of the Amplivo Network to grow and develop themselves to the next level.

More updates in regards to these and other topics will be shared in the next Newsletters. Stay tuned for more information.

CSR LAST UPDATES

THERAP CBD
2023 PLASTIC NEUTRAL BY CSR.

First CSR Labeled Plastic Neutral products are out!

We are extremely excited about the fact that, during the last two weeks, we have seen, not one, not two, but three brands take action to remove their plastic waste footprint from the packaging of their products.

We are therefore most happy to welcome Therap CBD, Athlete Fit Supplements, and Loxley Water as the very first brands in the world to begin using the prestigious CSR LABEL in their product packaging and thus communicating to their customers and the world, they are now taking responsibility for their plastic waste, while at the same time helping to solve the plastic waste problem globally.

What a great example these companies are for the rest of the world. True market leadership and leading by example.

As has been studied, as many as 80% of consumers would like to buy products and services from companies who are taking responsibility for their plastic waste. This opens new and massive opportunities for companies to attract new customers and also improve brand loyalty among existing customers.

The opportunities are unlimited!

We expect to see a lot of development in this area in the near future as more and more brands are joining our mission to begin using the CSR Plastic Credit as a way for them to become more sustainable in their operations.

Our target is that by the end of the year 2023, there will be at least 100 companies using the CSR Plastic Credit to reduce or to completely remove their Plastic Waste Footprint from their products.

At the moment the following Companies have started using the CSR Plastic Credit to make their products plastic-neutral:

- ***Therap CBD*** - Selection of CBD products - ***www.therapcbd.com***
- ***Athlete Fit*** - Health Supplements - ***www.athletefit.nl***
- ***Loxley Public Company Limited*** - Loxley bottled water - ***Watch video***

Additionally:
- ***The Erawan group*** - ***Watch video***
- ***Emporium Suites Bangkok*** - ***Watch video***
- ***Novotel Bangkok Platinum*** - ***Watch video***
- ***Chatrium Hotel Riverside Bangkok*** - ***Watch video***

If you own or if you know a company, or a brand, which products use plastic in their packaging, please get in touch with us, and let's work together to make these products plastic neutral with CSR Plastic Credit.

Please contact us directly at: ***plasticcredit@corsairnow.com***

2023 PLASTIC NEUTRAL BY CSR.

Moving toward Plastic Manufacturers

In recent weeks we have also been contacted by several plastic manufacturing companies from around the world, who have expressed direct interest in terms of forming collaborations with Corsair, where the plastic products manufactured by these companies, would be made plastic neutral by them, as the actual manufacturer of the product packaging instead of the end user, such as the brand owners or the users of the products.

We feel that the future of the plastic offset will most definitely be also in the collaborations with plastic manufacturing companies.

In this way, we will eventually reach a situation, where each kilo of plastic products from a production facility, has already been made Plastic Neutral with CSR Plastic Credit, at the very moment when it leaves the factory.

This is the future!

Distribution of CSR

We acknowledge that we have been having issues with the timely distribution of some of the CSR Plastic Credits for some of our customers. This is not a widespread issue but has involved buyers of the CSR Plastic Waste Removal Service from the initial launch year of 2021.

In other words, this means that some of the customers who have purchased a CSR Plastic Waste Removal Service during the year 2021 are still waiting for the delivery of some of their CSR Plastic Credits.

Initially, the objective of Corsair has been to deliver 100% of the CSR Plastic Credits for all of its customers over a period of 12 months. Unfortunately, some delays have occurred in this area and some deliveries have been delayed.

Two important elements in relation to this need to be taken into account:

1. Corsair has now resolved the matter so this issue will not be continuing or expanding any further or involving new customers. This has been done at the beginning of December 2022, by launching an automated delivery system, where the customers who purchase a CSR Plastic Waste Removal Service from Corsair, will automatically be receiving a distribution of 10% within the next week from their purchase and then an automated distribution of additional 10% every 4 weeks - in this way completing 100% of the distribution well within 12 months.

2. Corsair is quickly clearing any and all pending amounts of CSR distribution to the customers, who are waiting for part of their CSR to be distributed, in order to complete the 100%.

Over the recent months, Corsair has already cleared several months' worth of distribution. Distributions are being made every week and we expect to complete all pending distributions within the next months for any purchasers of Corsairs Plastic Waste Removal Service, who are currently waiting for the delivery of their CSR Plastic Credits.

In Summary:

The issue of the delivery has been solved so that this matter will not be expanded and every new sale of the CSR Plastic Waste Removal Service will be automatically receiving the 10% Distribution every 4 weeks.

At the same time, any and all late deliveries from the past are being taken care of in the fastest possible time frame. After this, the issue has been fully solved and won't happen again.

We thank you for your patience and support in this matter and take full responsibility for the late delivery, while we are working to become better and have made sure that delays in delivery won't be taking place anymore in the future.

Contribution program

A major and fundamental development in the global expansion of the CSR Plastic Waste Removal Service and the CSR Plastic Credit was the launching of the CSR Contributor Program.

This is something that was initially announced at the VISION 2022 Amplivo Global Summit, held in Bangkok in October 2022 and since then has been successfully launched in the United Kingdom and in Italy, from where plastic recycling companies have now joined Corsair in the process of assisting in the creation of the CSR Plastic Credit.

In other words, CSR Plastic Credit now also serves as a platform into which any plastic waste recycling company from around the world is able to apply and join, in order to contribute to the creation of CSR Plastic Credit.

We see major growth and future in this area - where our target is by the end of the year 2023 to have at least 25 Contributor companies from around the world, working together with Corsair in the creation of the CSR Plastic Credit.

With the involvement of multiple Contributors in the creation of the CSR Plastic Credit, the work associated with the creation of the CSR is no longer only depending on the work made by Corsair, but instead will be a community effort, where we aim to have hundreds of Plastic Waste recycling companies involved in the future (both mechanical and chemical recycling companies), bringing together everyone who is working towards solving the global plastic waste problem.

Always protect your CSR

An area which we cannot highlight enough is the importance of always protecting your CSR against theft, scams, and any type of unfortunate event involving centralized digital asset exchanges.

Unfortunately again this week, we saw another crypto exchange go bankrupt, causing thousands of people to lose their tokens as a result.

We STRONGLY recommend you immediately move out any CSR tokens that you might be holding in any of the public exchanges and instead move them into your private Metamask / Trust Wallet, in order to make sure that only you have the access to your CSR Plastic Credits.

Please also always make sure not to give the password or access keys of your wallet to anyone else.

We have seen many crypto exchanges go out of business during recent months and many others are at the moment downgrading their operations, reducing staff, and taking other cost-saving actions, which simply speaks for a situation, where the exchanges are not making as much money anymore as they used to.

This can lead to many problems, the worst being bankruptcy, where the exchange simply declares bankruptcy due to its failed financial situation. In this case - almost every exchange will take full legal possession (according to the terms and conditions of the exchanges, which users have agreed upon signing up to the exchange) of the ownership of all tokens on the platform.

This means that if the exchange goes bankrupt, you might lose all of your CSR.

If this happens, there is very little that can be done and most probably you will have lost all of them. Please be aware that Corsair or Amplivo is not able to assist you in case you would lose your CSR Plastic Credits in an exchange.

Please therefore - especially at this moment when the future of many centralized exchanges (including the exchanges which are trading CSR Plastic Credit - such as Latoken, XT, P2P, and Coinsbit) is very uncertain, PLEASE take proper care of your CSR and do not hold them on the exchanges, but instead move them out from the exchanges and hold them in your secure private wallet. You can always move them back to the exchange later if you wish.

Thank you all for your attention and for taking this matter seriously.

More updates in regards to these and other topics will be shared in the next Newsletters. Stay tuned for more information.

CORSAIR LAST UPDATES

CORSAIR
FOR A CLEANER FUTURE

Corsair Nordics

We are excited to tell you that we are making great daily progress with our first European Corsair processing facility, to be launched soon in the Nordic Countries.

Corsair has been working for a long time in order to find the most suitable location in Europe to launch its operations. Eventually, the most suitable location was found in the Nordic Countries.

This location fulfilled all the requirements of suitability and we have, in recent months, been making the needed preparations for the launching of the project. We have also been extremely happy to receive a lot of positive support from the local government, in order to welcome us to the city of the new facility.

Our first production unit for the Nordic project is already in Europe and our teams are working continuously towards establishing the first machine in the project facility. From this first machine, we will be able to provide more exciting news soon.

Additionally, to the general project development of the facility, we have also been making major progress in regards to securing other important elements for the project facility, such as, for example, suppliers of Plastic Waste raw material feedstock and buyers of the produced oil.

In regards to the feedstock suppliers; we have started discussions with several raw material suppliers, who have offered us the opportunity to receive their plastic waste raw material - collected from local communities across Europe as well as from the Nordic countries.

As a major difference compared to our operations in Thailand, in Europe we are also able to attract a so-called "gate fee", which means that Corsair will be receiving payment, when it accepts to receive the plastic waste raw material to its facility.

We see the Nordic facility becoming a recycling hub, where otherwise hard-to-recycle plastic waste from all over Europe can be sent to be properly recycled by Corsair.

Additionally, we have also already started serious negotiations with several off-take partners in regards to the sales of the produced oil from the Corsair Nordic facility. We have seen a lot of interest in this area, as the European Union is at the moment globally spearheading the legislation for the use of recycled plastic waste in the production of new plastic raw materials.

As an example, it is at the moment, a requirement, that plastic manufacturing (Petrochemical) companies are by law obligated to use the type of oil which is produced by Corsair, as a raw material for the manufacturing of their new plastic products sold or manufactured in Europe.

In 2022 Corsair became the first company in Thailand to receive the prestigious ISCC certification for its production operations, which has made Corsair oil a greatly sought-after product in the International Advanced Bio-oil markets.

Together with the ISCC certification, Corsair oil has also been widely recognized for its high quality and is confirmed to be suitable for the use of the plastic manufacturing / Petrochemical industry as a raw material for the production of new plastic products.

The current global demand for Corsair's oil and similar quality Advanced Bio-oil products is approx. 100 Billion liters per year, whereas the global production output is at the moment only approximately 30 million liters per year.

Corsair's target is to, by the end of 2023, produce 1 Billion liters of Advanced Bio-oil per year and by doing so, satisfy 1% of the global demand.

Other Expansions and Meaningful Partnerships

Corsair is continuously in the process of developing and expanding its operations in all of its core business areas:

1. Building and operating Plastic Waste Chemical Recycling Facilities
2. Forming Meaningful Business Partnerships
3. Oil Product Development
4. CSR Plastic Credit Development
5. Amplivo Network Development

We see a great year of 2023 ahead of us with a lot of progress, where Corsair, Amplivo, and CSR will continue to grow even faster than in 2022!

We cannot express how excited we are to be launching this year with you and to deliver many exciting news and announcements for you in regards to our global expansion.

2022 was the year when the strong foundation of our company was buil and this year we will be able to place elements on top of this foundation and to "shoot this rocket into the atmosphere"!

More updates in regards to these and other topics will be shared in the next Newsletters.

Stay tuned for more information.

LATEST PROMOTIONS

January promotions

We are always looking for ways to provide you as an Amplivo Influencer with the most exciting and best tools to build your Amplivo business with us.

FOR ALL AMPLIVO INFLUENCERS
SPECIAL PROMOTION
EXTRA 10%
SALES BONUS COMMISSION for sales of Packages!
AMPLIVO

Promotion to celebrate the major recent progress with CSR!

To celebrate us together reaching one of the most important milestones in the history of the CSR Plastic Credit so far.

Altogether 3 different consumer products have now been made Plastic Neutral with CSR Plastic Credit.

Over the next 2 weeks, Amplivo is offering a Special Extra Sales Bonus Commission for all package sales made between Saturday 21.1.2023, 00:01 GMT, and Friday 3.2.2023, 23:59 GMT, for all Amplivo Influencers.

The Extra Bonus Commission will be paid in Gift Codes to the value of 10% of all sales made in your First Line during the promotional period, with the qualification requirement of having generated, in your first line, at least 2,000 Euros of sales volume within the 2-week promotional period.

For example, if your First Line redeems a total of 5,000 Euros in packages during the 2-week promotional period, an extra 500 Euros on top of the standard 600 Euros (12%) will be paid = all together 1,100 Euros (22%)!

Make use of this great Promotion and let's Kickstart 2023 together with a Big Bang!

Thank you all

We feel that 2023 will become the greatest year so far for all the Corsair companies, the Amplivo Network, and the CSR Plastic Credit.

We have a lot of work ahead of us and we thank you all for your continuous support for us in the Management of the companies.

We wish to highlight to you, that we as a company are here to stay. Amplivo is not a Network Marketing company that will be here one day and gone the other.

We are looking to build and develop this company and our amazing business opportunity to become a Multinational, Multi-Billion Euro company with millions of members around the world. We will not stop until we get there and we will never give up!

The demand for CSR Plastic credit is increasing each day and we see how new doors of opportunity keep on opening for us every day as we work on this amazing business.

We truly wish to thank you all for being part of this amazing journey.

Let's make this the most amazing year for us all!

With Kindest Regards,

Jussi Veikko Saloranta
CEO Amplivo Limited / Corsair Group International
